

## **Step one is read your report.**

You have received a state of the art wind mitigation inspection and detailed report by a professional and licensed Florida Inspector. Typically, a \$150 value.

Read and understand what actions can be taken by you the homeowner to strengthen your home and reduce your home insurance premiums.

## **Once you have read your report and understand the findings, YOU ARE DONE.**

You do not have to do anything else. The MSFH program says thank you for participating in the program and we hope it was a positive learning experience and you reduce your home insurance premium. **So submit your inspection report to your insurance agency** and make sure you are getting all the discount savings you are entitled to. These inspections are usually done at least every five 5 years or when applying for new insurance.

## **If you are a homeowner who wants to move forward, think of your inspection report as a road map for strengthening your existing home.**

Look carefully at all the suggested upgrades and decide which one(S) make the most sense and fit your budget. Many homeowners are now adding home strengthen in their home upgrade program like adding a new kitchen or bathroom. Why? Your home will be more resilient in storms, your family and possessions should be safer. Your improvements could improve the value of your home and entitle you to additional insurance premium discounts.

## **Another step to consider would be to apply for a MSFH grant.**

From the program to help you defer the costs of your home improvements. To apply for a grant, return to your participant portal account and complete the grant application. If you are eligible, and you qualify for a grant you will be notified by EMAIL that your grant was approved. Once approved, you will be provided a list of approved program contractors from who to recruit up to three bids on your work project.
